

Wine Data Lake Web Application Installation

Last Updated: August 10th, 2022

Evaluation Environment

An evaluation environment will be live from August 10th, 2022 to September 17th, 2022. It has been deployed to the below address using the developers' personal cloud accounts. After September 17th, the web application and database will be spun down and the web application *will no longer be live*. By this period, the project should have been migrated to the company's cloud accounts and/or will need to be rebuilt from the source code.
